

Industrial Visit To LEONI Wiring Systems, Tunisia

« You become what you think about all day long. ».

But how could you think about something you have never seen? Is it even possible to imagine what you want to do a few years later as an engineer, working in the industrial field when you have no idea of what is going on inside a factory ?

Pushed by the desire to make students aware of the industrialist's expectations from the fresh engineers, IEEE IAS Chapter INSAT SB team arranged a number of industrial visits during this academic year, and the first one took place yesterday, on March 30th 2016. In fact, a group of 14 students, studying in the National Institute of Applied Sciences and Technology, had the opportunity to visit LEONI Wiring Systems, Susah.

About LEONI ...

The official opening of a LEONI subsidiary in Tunisia was in 1977. Since then, LEONI subsidiaries have become the biggest private employers in Tunisia, counting 13520 employees - 276 of whom are engineers-. This number represents 19,4% of the total number of LEONI employees worldwide. For decades, LEONI clients have been the most renowned automakers: Audi, VW, BMW, and Mercedes, which is the most important client currently.

About the visit ...

After 30 minutes presentation of LEONI, during which its various aspects were discussed in great details, all the participants were allowed to an industrial visit on the field of production of automotive wiring

systems manufactured for “Porsche Panamera” and “Audi A4”. This visit was insured by the training manager Mr. Jamel Graiet.

Indeed, the working of industrial equipments in running conditions was explained to the students, enabling them to understand the functioning of different machines and get answers to their questions.

After a few hours spent in this factory, every student gained a nonesuch experience that will certainly influence their future career choices and decisions. But this is just the beginning as future visits are already planned and will be, hopefully as successful as the first one. Stay tuned ...
